Profile

Motivated data engineer with solid skills in Python, SQL, Cloud data platforms and services with previous professional experience on full-stack engineering. Passionate about bridging the gap between application logic, data processing and analytical data insights.

Professional Experience

04/2023 – Present

Freelance

Data Engineering / Web Development

- Built small applications and tools using JavaScript and Python to strengthen practical development skills.
- Implemented basic data pipelines, integrating dbt, Airflow, and Spark in personal learning environments.
- Developed personal projects to reinforce learning in data engineering and analytics.

10/2022 – 06/2023

Prishtina, Kosova

Pabau Clinic Software

Full Stack Developer

- Transitioned into a full-time role after completing the internship, demonstrating exceptional performance and dedication.
- Developed and maintained software applications.
- Collaborated closely with team members to analyze requirements, design scalable solutions, and ensure timely project completion.
- Actively participated in agile development processes, attending daily stand-ups and contributing to sprint planning and retrospectives.
- Demonstrated adaptability and quick learning by acquiring new technical skills and effectively applying them to project.

07/2022 – 10/2022

Pabau Clinic Software

React Developer Intern

- Collaborated with CRM product team at Pabau, a clinic management SaaS platform.
- Developed core CRM features using React on Next framework and integrated GraphQL APIs.
- Improved database scalability utilizing Hasura.
- Analyzed performance considerations and optimized user experience in CRM systems.
- Navigated complex enterprise codebase and adapted to industry-specific business logic.

Education

10/2016 – 10/2021

Bachelor's Degree in Computer Science

University "Ukshin Hoti" Prizren

Skills

Python

Pandas, NumPy

Data Engineering

SQL, Spark, dbt, Airflow, Power BI.

Cloud

GCP, Azure, AWS

Developer Tools

Git, Docker

Web Development

HTML, CSS, JavaScript, React, GraphQL

Courses & Certifications

The Complete Python Bootcamp From Zero to Hero in Python

Udemy

Associate Data Engineer in Python

DataCamp

Data modeling and manipulation, cloud computing.

Data Analyst in Python

DataCamp

Storytelling, visualizations.

dbt Fundamentals

dbt Labs

Data modeling, modular data marts, transformations.

JavaScript - The Complete Guide, React - The Complete Guide

Udemy

Projects

E-commerce Azure Databricks Data pipeline

- Technologies and stack: Azure Cloud, Databricks, Spark, Power BI.
- Designed and implemented a cloud-based data pipeline for e-commerce data processing using Azure and Databricks, demonstrating medallion architecture from raw to bronze, silver, gold and analysis in Power BI.

NYC Taxi Dataset Pipeline

- Technologies and stack: Google Cloud, BigQuery, Python, Spark, SQL, dbt, Airflow, Power BI.
- Designed and implemented a containerized ETL pipeline for NYC taxi data using Python, Spark, Docker, Airflow and dbt for data modeling, enabling efficient data processing and analysis in Power BI.

CarePlus Data AWS Pipeline

- Technologies and stack: AWS Redshift, Glue, QuickSight, Python, SQL.
- Built a cloud-based healthcare data pipeline on AWS using Python, implementing scalable ETL processes using Glue, Lambda, Redshift for warehousing and QuickSight for analysis and dashboarding.

Polygon Daily Market Data Pipeline

- Technologies and stack: AWS, Snowflake, Python, SQL, Airflow, Power BI.
- Engineered a daily market data pipeline integrated with the Polygon API using Python and Docker, automating financial data collection via Airflow, transformation, and storage for market analysis in Snowflake and Power BI.
